

KNIGHT

Bleach/Sour Safety Circuit

Safety Circuit Prevents Simultaneous Dispensing of Non-compatible Chemicals

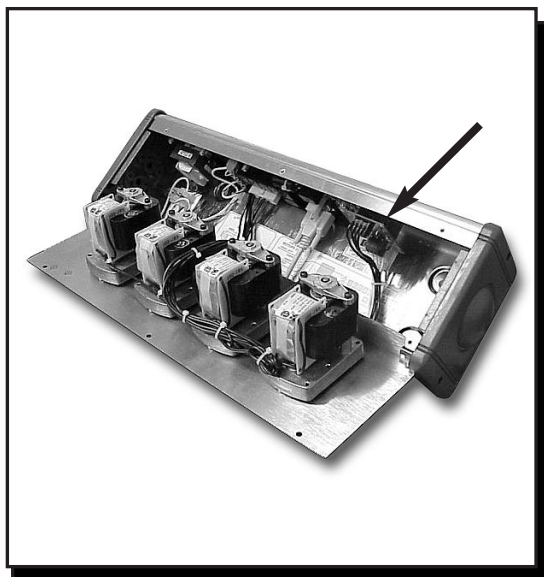

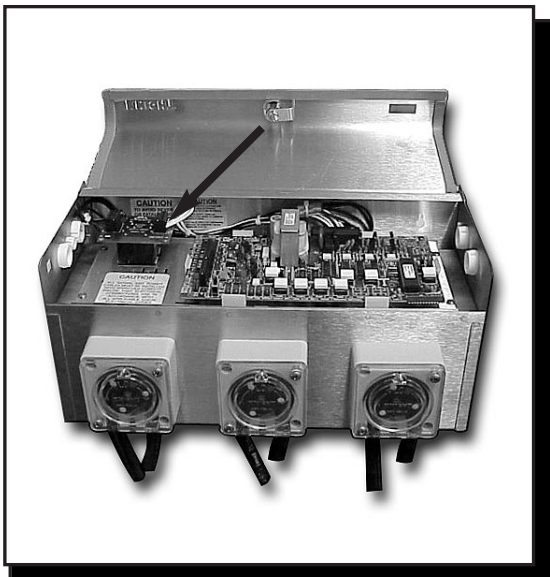

All microprocessor electronics for Laundry Chemical Dispensers are as vulnerable to malfunction caused by electrical power spikes, brownout and lightning strikes as your home PC. Electrically induced malfunctions can cause any laundry chemical dispenser to trigger pumps at random and possibly dispense bleach and sour at the same time. Now you can prevent this from happening to your laundry chemical dispenser with Knight's patented Bleach/Sour Safety Circuit. This simple patented circuit prevents accidental or electrically induced dispensing of bleach and sour to the washer. The Bleach/Sour Safety Circuit can be quickly and easily installed on laundry chemical dispensers from any manufacturer for improved safety and peace of mind. Call today for more information.

SPECIAL FEATURES

- Simple to Install
- Low Cost
- AC or DC Operation
- Compact - Fits any Dispenser

Use Bleach/Sour Safety Circuit with any manufacturers dispenser.

Special Introductory Net Pricing Through Dec. 1, 2000
